Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

- 1. (Original) An effervescent formulation comprising apomorphine.
- 2. (Original) An effervescent formulation according to Claim 1 comprising multilayer effervescent microspheres.
- 3. (Original) An effervescent formulation according to Claim 2 wherein the multilayer effervescent microspheres contain an acidic substance, a basic substance and water-soluble isolating agent.
- 4. (Original) An effervescent formulation according to Claim 3 wherein dissolution in water of the multilayer effervescent microspheres leads, after almost immediate effervescence, to a solution or a homogeneous dispersion of the apomorphine.
- 5. (Original) An effervescent formulation according to Claim 4 wherein the water-soluble isolating agent is dispersed in the entire bulk of each microsphere, the latter having a two-layer structure: a layer of acidic substance in which is dispersed the water-soluble isolating agent and a layer of alkaline substance in which is dispersed the water-soluble isolating agent.
- 6. (Original) An effervescent formulation according to Claim 4 wherein the water-soluble isolating agent is in the form of a thin film separating the acidic and alkaline substances such that each microsphere has a three-layer structure: a layer of acidic substance and a layer of alkaline substance separated by a layer of water-soluble isolating agent.
- 7. (Currently Amended) An effervescent formulation according to any of the preceding claims Claim 1 wherein the apomorphine is present in a unit dose amount of from 0. 5mg to 50mg.
- 8. (Original) An effervescent formulation according to Claim 7 wherein the apomorphine is present in a unit dose amount of 2mg to 3mg.
- 9. (Currently Amended) An effervescent formulation according to any of the preceding claims Claim 1 wherein the formulation is presented in a tablet form.

- 10. (Currently Amended) An effervescent formulation according to Claims 1 to 8 Claim 1 wherein the formulation is presented in a powder form.
- 11. (Currently Amended) An effervescent formulation according to any one of the preceding claims Claim 1 wherein the apomorphine is present within a microsphere.
- 12. (Currently Amended) An effervescent formulation according to any one of the preceding Claims 1 to 11 Claim 1 wherein the apomorphine is not present within a microsphere.

13-14. (Canceled)

- 15. (Currently Amended) A pharmaceutical composition comprising an effervescent formulation according to any one of Claims 1 to 13 Claim 1 and a pharmaceutically acceptable carrier.
- 16. (Original) A process for making an effervescent formulation containing apomorphine.
- 17. (Original) A process according to Claim 16 wherein the effervescent formulation comprises multilayer effervescent microspheres containing an acidic substance, a basic substance, and a water-soluble isolating agent which upon dissolution in water leads, after almost immediate effervescence, to a solution or a homogeneous dispersion of apomorphine.
- 18. (Original) A process according to Claim 17 wherein the acidic and/or basic substances contains or contain apomorphine.
- 19. (Currently Amended) A process according to Claim 16 or Claim 17

 Claim 16 further comprising:

forming microspheres, wherein the apomorphine is not present in the microspheres.

20. (Original) A process according to Claim 18 which employs the method of rotary granulation in a fluidized air bed.

- 21. (Currently Amended) A process according to Claims 17 to 20 Claim 17 wherein basic substance also contains an edible diluant and/or flavourings and/or sweeteners.
- 22. (Currently Amended) A process according to Claims 17 to 21 Claim 17 wherein the apomorphine is present in an amount to give from 0.5mg to 50mg in the final unit dosage form.
- 23. (Original) A process according to Claim 22 wherein the apomorphine is present in an amount to give from 2mg to 3mg in the final unit dosage form.
- 24. (Currently Amended) A process according to any one of Claims 16 to 23.

 Claim 19 further comprising preparing the microspheres into a tablet.
- 25. (Original) A process according to Claim 24 wherein the apomorphine is present on or between the microspheres in the tablet.
- 26. (Currently Amended) An effervescent formulation of apomorphine obtained or obtainable by the process of any one of Claims 16 to 25 Claim 16.
- 27. (Currently Amended) A method of treating human male or female sexual dysfunction comprising administering to said human an effervescent formulation of apomorphine according to any one of Claims 1 to 13 and/or obtained or obtainable by a process as defined in any one of Claims 16 to 26 and/or a pharmaceutical composition according to Claim 15 Claim 1.

28. (Canceled)

29. (New) The method according to Claim 27, wherein the effervescent formulation is present in a pharmaceutical composition that includes a pharmaceutically acceptable carrier.
